

Build your wealth

Building your wealth isn't something just for people who have lots of money. Many fortunes have been started by saving just a few dollars a day.

1.

Know your financial starting point

To build your wealth, you need to know your starting position. Make a list of all your assets and liabilities. Review the list each year to see how much progress you're making towards building a wealthier future.

To get started, check out the asset [stocktake calculator](#) provided by moneysmart

2.

Create a goal

If you're focused on building wealth, it helps to have a clear goal in mind. Is it financial independence or early retirement?

Once you have your goal, determine how much you can afford to invest each month, and arrange to have that investment made automatically.

Be patient and stick to your plan.
